

CAPACITY

I am an Information Technology graduate with a strong foundation in programming and IT systems and currently honing my skills as a Data Intern. I am passionate about leveraging data-driven insights to solve real-world problems and support business decision-making. With hands-on experience in data collection, cleaning, and visualization, I am eager to further develop my expertise in data analytics and database management. My goal is to contribute to an innovative team while continuing to grow professionally in the tech industry.
